

Creating the perfect model of off-highway vehicle recreation for all land managers, program administrators, and enthusiasts.

INOHVAA Position Statement regarding size limitations of Recreational Off Highway Vehicles

As the lead organization in promoting excellence in the management of organized off highway recreational vehicle (OHV) trails, the International Off Highway Vehicle Administrators Association (INOHVAA) encourages the OHV manufacturers to recognize that existing trail systems may have width limitations and manufacturers should market appropriately.

OHV size may impact trail design, maintenance and safety on existing trails. Wider trails may not be permitted by landowners/managers and potential use/abuse by unauthorized larger vehicles may lead to the loss of trails.

INOHVAA encourages manufacturers to take an active role to educate customers on federal, state, provincial and local OHV restrictions and limit marketing wider vehicles where they are not appropriate.
